DETAILED ACTION

Drawings

1. The drawings filed December 16, 2004 are objected because all boxes in the Figures should have descriptive legends attached to them. Thus the boxes in 2-6 should be labeled.
2. Formal drawings are now required.

Preliminary Amendment

3. The preliminary amendment filed December 14, 2004 has been entered and considered.

Specification

4. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT

- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Priority

5. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

6. The information disclosure statement filed December 16, 2004 has been entered and considered. An initialed copy of the PTO-1449 by the Examiner is attached.

EXAMINER'S AMENDMENT

7. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

In claim 1, line 10, change "is" to - - in - -.

Allowable Subject Matter

8. Claims 1-20 are allowed.

Examiner's Reasons for Allowance

9. The following is an examiner's statement of reasons for allowance:

The prior art fails to render obvious the claimed radar system and method for obtaining high range resolution including, inter alia, applying a time- dependent phase shift, changed at discrete time intervals, to the radar pulse at substantially the radar transmission frequency, applying a time-dependent phase shift, changed at discrete time intervals, to the received radar pulse at substantially the radar transmission frequency, and sampling the received signal at discrete time intervals which are an

integral number of the time intervals of the time- dependent phase shift as operatively and functionally claimed.

The closes prior art, as exemplified by EP 291337 A2 to Nippon Electric, discloses a radar system in which phase processing is carried out in order to eliminate ambiguity problems. This is achieved by alternating the phase of successive transmitted radar pulses and detecting the phase of the reflected signal under the respective phase references associated with the transmitted pulses. However, difference between EP 291337 A2 to Nippon Electric and the present application is that, in EP 291337 A2 to Nippon Electric, the phase is changed between successive pulses whereas multiple phase changes are made within each pulse in the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.
